Subject: Re: ECFS - API and limits

Thanks Melissa, but unfortunately that won't work. We need the comments recorded individually.

We will need to set up multiple servers to feed the API simultaneously to meet the delivery needs of our clients. Do you foresee any problems with that approach. I don't want to create any technical problems for you.

Thanks again, I appreciate your help.

If you give us a CSV filing it will be bulk together and not individual. If you would individuals submissions I would suggest the API method.

Thanks
Melisa

Subject: Re: ECFS - API and limits

Hi,

Thanks for this information. I assume that is per IP address?

I appreciate your flexibility with the csv file option. How can I confirm that is possible? I am looking to deliver about 250,000 comments per day. I would need to ensure that each comment is recorded individually (not in bulk). Can you confirm that as well?

Dan

We have a limit of 1500 API requests /Hour. Additionally, we can also look into CSV data load to facilitate high volume comment filings.

Thank s

Thanks for the fast response. The docket will be on internet privacy, it is not yet published. We believe it will be published later this month (do you know?).

Our system is currently designed to submit comments through the web forms on regulations.gov (regulations.gov does not have an API to submit comments), however we just noticed that FCC has an API that is capable of submitting comments (nicely done!). So we are evaluating if we can change our system quickly.

I don't know the specific day we would plan to submit, but I know it will be a lot of submissions over several or many days.

Thank you for contacting the FCC. Someone will contact you regarding the limitation for the API. Can you tell me what docket do you plan to submit the comments into? Do you have a specific day you plan to upload the comments into the docket?

Thanks

Subject: ECFS - API and limits

Hi,

We are working on a campaign for one of our customers that might have us submitting millions of individual comments to a forthcoming proceeding. We don't want to create any technical problems in your environment. Where can I find the API limitations? Web form limitations?

Or would you prefer to receive a csv file that you can upload directly in to your system?

—from web ---

Your use of the API may be subject to certain limitations on access, calls, or use as set forth within this Agreement or otherwise provided by the FCC. If the FCC reasonably believes that you have attempted to exceed or circumvent these limits, your ability to use the API may be permanently or temporarily blocked. The FCC may monitor your use of the API to improve the service or to insure compliance with this Agreement.

Many thanks,
Dan
